About IIIT Bhopal

The Indian Institute of Information Technology, Bhopal (IIIT Bhopal) is an eminent educational institute established by the Ministry of Education, Government of Madhya Pradesh, and RGPV (Bhopal) as Not-for-profit Public Private Partnership (N-PPP) Institution. The institute has been recognized as an "Institute of National Importance" by the Government of India under the IIIT Act of 2020. From its humble origins, IIIT-Bhopal has strived to flourish as a well-rounded and diversified organization. Since its establishment in 2017, we consistently aim to create an ideal ambiance for budding technocrats and allow them to come out with flying colors. IIIT-Bhopal envisions nurturing intellectual capital by transforming aspiring students into competent professionals and leaders contributing to societal development. Our mission is to integrate quality learning and research transcending cultural boundaries and nurturing talent with a holistic approach. The 650- acre campus is equipped with Wi-Fi connectivity and CCTV surveillance as well as excellent amenities for sports and recreational activities. IIIT Bhopal offers various undergraduate programs in Computer Science, Electronics & Communication Engineering, Information Technology, and their industrial applications. Our students boast diverse skill sets including Blockchain, Internet of Things, Data Science & Analytics, Artificial Intelligence & Machine Learning, Big Data, Cloud Computing, Web Development, Android / IOS development, UI/UX design, Project Management, System Design, VLSI, Wireless Communication, Embedded Systems, and Signal Processing, etc. Our academic scheme resonates with that of the mentor institute, NIT Bhopal, and academic mentor, IIIT Hyderabad. IIIT Bhopal is an open-to-industry institute, and so we are always ready to change our curriculum as per the requirement of the Company. The training and placement cell at IIIT Bhopal aims to bring recruiters and students together to launch the journey of a new alliance. IIIT Bhopal has outshone itself by giving over 90% placements with the highest package offered being 85 LPA and the average package of 16.7 LPA in the academic session 2025-26 with the top picks by Microsoft, Zomato, Rippling and Paypal,

Director's Message

Prof. Ashutosh Kumar Singh

"Indian Institute of Information Technology, Bhopal is an institute of national importance, with Maulana Azad National Institute of Technology as its mentor. We aspire to establish the traditions that reflect the vision and determination of the institute works to bring out the professionals who become the assets of your companies tomorrow. The atmosphere of the institute is very inspirational with each entity striving to prosper and be a reason for society's prosperity. The institute targets producing technical professionals embellished with tactful logical skills and synchronous management skills. It focuses on developing a culture of hard work and great team spirit amongst the students. We highly value the attention of all the interested companies and are committed to make the recruitment experience tremendous and futuristic. I, on behalf of our institute, graciously invite your company for campus recruitments and other purposeful academic activities."

TNP Cell Head's Pen

Er. Ajay Shrivastava

It is a great privilege for our institute to reach out to your organisation with the most warm greetings for campus recruitment. It gives me colossal joy to accentuate that our recently settled organization, with its regarded modern accomplices, has sent off the third group of undergraduates as the hopeful experts of tomorrow. At the outset, I would like to thank and compliment the IIIT Bhopal community group and our regarded selection representatives for their commitment and backing to the Institute. I compliment the undergraduates for satisfying the hopes of our selection representatives. I firmly believe that the Institute has certainly carved a niche for itself and is poised to scale even greater heights in the near future. The excellent academic programme at IIIT Bhopal, in accordance with MANIT Bhopal, as well as the extracurricular activities, prepare students for today's reality and real-world challenges. I want to guarantee every one of the partners that IIIT Bhopal comprehends the high speed of changes happening in the field of data innovation. To adapt to the speed of progress, we embrace the audit of the scholastic educational plan consistently. Fine-tuning of the course and educational plan, presentation of new courses, and modifications of course contents are being done regularly in accordance with the recommendations and suggestions provided by the Board of Studies and approved by the Senate.

Why Recruit from IIIT Bhopal

An Institute Of National Importance

The IIIT Amendment Act of 2020, enacted by the parliament, designates IIIT Bhopal as an institute of national importance. The institute fulfills a significant role by preparing future technologists to become respected and responsible citizens who will eventually launch startups and contribute to the nation's technological advancement.

Top notch Mentor Institute

MANIT Bhopal, the mentor institute of IIIT Bhopal, is one of the country's top technological institutes. The mentor institute's experienced faculty and facility have always encouraged students to grow and flourish. It has a large alumni network and a well-established Training and Placement Cell (T&P) that oversees the IIIT Bhopal T&P Cell.

Academic Excellence

The brilliantly constructed system of IIIT Bhopal is primarily concerned with the technological development of students. The academic programme is mirrored from its mentor institute, MANIT Bhopal.

Choice of Curriculum

The institute provides a wide range of course options as well as non-academic activities. Computer Science and Engineering (CSE), Information Technology (IT), and Electronics and Communication Engineering (ECE) are the three courses available. Various clubs and Societies are there such as Codame, Kratigence, GDSC, etc. which are working to equip students with tactful skill sets to prepare them for future challenges.

Culture worth preserving

The institute began with lofty goals, the fulfilment of which manifests itself in placements across several platforms. The close-knit culture of the college has opened doors to holistic development and fostered great opportunities for getting practical hands-on experience in technological advancements and innovations.

Programmes Offered

B.tech

Computer Science

Computer Science and Engineering focuses on computer programming, software development, algorithms, artificial intelligence, databases, networking, and operating systems. Students learn to design and develop software applications, websites, and intelligent systems. Career opportunities include software engineer, data scientist, AI engineer, and system analyst.

Information Technology

Information Technology deals with the application of computers and technology in managing information systems. The course covers networking, web technologies, cloud computing, cybersecurity, and database management. Graduates often work as IT consultants, network administrators, web developers, and cloud engineers.

Electronics & Communication

Electronics and Communication Engineering focuses on electronic devices, communication systems, embedded systems, VLSI, and signal processing. Students gain knowledge of both hardware and communication technologies used in mobile networks, satellites, and IoT devices. Career options include electronics engineer, communication engineer, embedded systems developer, and telecom engineer.

M.tech

Artificial Intelligence

Artificial Intelligence is a postgraduate specialization that studies machine learning, deep learning, neural networks, natural language processing, and intelligent systems. The program prepares students for research and industry roles such as AI engineer, machine learning engineer, and research scientist.

Data Science

Data Science focuses on data analysis, big data technologies, statistics, machine learning, and data visualization. Students learn to extract meaningful insights from large datasets for decision-making. Career roles include data scientist, business analyst, and data engineer.

Cyber-Physical Systems

Cyber-Physical Systems combines computing, communication, and physical systems to develop smart technologies such as robotics, autonomous vehicles, smart grids, and IoT systems. The course emphasizes embedded systems, sensors, automation, and real-time computing.

MCA

Master of Computer Applications is a three-year full-time postgraduate program focused on advanced computer applications, software development, programming languages, databases, and system management. It prepares students for careers in software engineering, application development, and IT management.

Advantages for Recruiters

With a proven track record spanning over five successful placement cycles, IIIT Bhopal has solidified its position as a powerhouse of technical talent. Transitioning from a "rising institute" to a national leader, we consistently outpace our contemporaries in technical innovation, student resilience, and placement outcomes.
For the 2026–27 season, recruiters are engaging with a batch that has been forged through a rigorous, industry-aligned curriculum and a culture of high-stakes competitive engineering

We continue to boast the highest placement metrics among all IIITs established in the same era. With a peak CTC reaching ₹56 LPA and a robust average across all branches, our students deliver immediate value to high-growth product teams

Roles

Software Development

Students possess strong foundations in Data Structures & Algorithms, problem solving, system design, and software development. They actively participate in coding contests, hackathons, and large-scale project development. Recruiters in this domain include Amazon, Microsoft, Tekion, Postman, BrowserStack, Commvault, IBM, and CRED.

Web Development

Students build scalable full-stack applications using modern frontend, backend, database, and cloud technologies. Their experience spans web platforms, APIs, authentication systems, deployment pipelines, and product engineering. Recruiters include Flipkart, Meesho, Swiggy, Zomato, Rippling, Motive, Agoda, OLA, and Publicis Sapient.

Cloud & Cybersecurity

Students develop expertise in cloud computing, network security, system administration, virtualization, and secure software development. Their training focuses on designing scalable cloud infrastructure, protecting digital assets, managing enterprise systems, and implementing security best practices for modern applications.

AI & Machine Learning

Students work on Machine Learning, Deep Learning, Computer Vision, NLP, and Generative AI applications. Through research and industry projects, they develop intelligent solutions for real-world challenges across multiple domains. Recruiters include NVIDIA, Qualcomm, AMD, Samsung, TrueFoundry, Sigmoid Analytics, AiDash, and Nference.

Roles

R&D

Students engage in research-driven problem solving across emerging technologies, contributing to innovative solutions through projects, publications, competitions, and interdisciplinary collaborations. Recruiters and collaborators include Samsung, Texas Instruments, Qualcomm, MathWorks, Siemens, Ericsson, and Huawei.

VLSI & Electronics

Students possess strong foundations in digital design, semiconductor systems, verification, embedded systems, and hardware-software co-design.. Through laboratory work and industry-oriented projects, they gain practical exposure to modern electronic systems. Recruiters include NVIDIA, Qualcomm, AMD, Texas Instruments, Synopsys, Samsung, and Ericsson.

Data Science

Students leverage statistics, data visualization, business intelligence, and machine learning techniques to derive actionable insights from complex datasets. Their experience spans predictive analytics, dashboarding, reporting, and data-driven decision making. Recruiters include Alteryx, Sigmoid Analytics, Deloitte, IBM, Groww, Upstox, and Fisdom.

Product Management

Students combine technical expertise, analytical thinking, and user-centric problem solving to build impactful digital products. Experience spans product strategy, stakeholder collaboration, market analysis, and data-driven decision making. Recruiters include CRED, Juspay, PayPal, Cashfree, Flipkart, Meesho, and Zomato.

Facilities For Recruiters

The institute features a well-equipped auditorium, computer centre and smart classrooms for conducting pre-placement lectures, analytical examinations and a guest house with conference rooms for Group Discussions and Personal Interviews. Assisted by StudentPlacement Coordinators, facilities like video conferencing are also available for conducting one-to-one interviews. The old Student Activity Centre (SAC), presently known as Dr. S. Radhakrishna Auditorium is furnished with an advanced JBL Hi-Tech Surround Sound System and can accommodate around 800 individuals. The computer centre ceaselessly offers sustained services of power supply, simultaneous examinations and online tests to on-campus students, thereby facilitating their studiesand research work.

We are Open For

01 B.Tech. Final year (CSE/IT/ECE) (2027 Graduate): Full Time Employment (FTE) and/or 6 months internship (semester-long internship in 8th semester).

02 B.Tech. Pre-final year (CSE/IT/ECE) (2028 Graduate): 2 to 3 months summer internship and pre-placement offer during the internship.

03 A remote internship can be pursued anytime during the year unless it affects the academics of students.

Placement Procedure & Policies

Procedure

1	2	3	4
Pre-Placement Talk	Assesment Test (s)	Interviews	Job Offers

General Rules

01 If a student secures an internship in any category and the company offers a PPO, the student will be considered as placed. If that internship doesn't end in a PPO, the student is eligible to reappear in the placement drive.

02 If a student is not interested in the company offering PPO, he/she must 02 not participate in the internship test procedure as well.

03 In the event of a conflict during simultaneous recruitment by multiple companies, students must choose one company and proceed only with that one. Once a decision is made, it cannot be changed after advancing in the selection process.

04 Student withdrawing after being shortlisted by a company at any stage 04 will be debarred from participating in the recruitment process of next 3-4 companies he/she has applied to and been shortlisted.

05 Student should not disclose any information regarding the placement 05 process including company, package offered etc., in any public forum/social media without taking consent from the placement cell.

Recognitions & Achievements

- 5 Smart India Hackathon Winners and multiple finalists
- All-India Winners of Meesho's "Scripted by Her" 2026
- 2 Students Selected for Google Summer of Code (GSoC)
- 3 Students Selected for the Linux Foundation Mentorship (LFX) Spring 2026 Cohort
- 3 Students accepted in Amazon ML Summer School
- Access to a Dedicated Deep Research Environment
- Publications in IEEE-Indexed Conferences and Journals
- Research Internships at Premier Institutes Including IIT BHU, IIT Indore, University of Aizu, and many more
- State-of-the-Art Research Facilities in Collaboration with MANIT Bhopal
- Multiple ICPC Regionalists and High-Ranking Competitive Programmers

Clubs

CODAME

Codame assists in the maintenance of a coding environment in which students can receive support and mentorship in order to improve their coding abilities. Coding competitions, webinars,and hackathons are among the events that are held.

SPARK

SPARK (Society for Programming, Automation, Research & Knowledge) is a student-led community that brings together innovators passionate about technology, programming, and research. Through projects, workshops, and technical events, SPARK fosters creativity & collaboration

GDG

GDG IIIT Bhopal is a student-driven tech community that empowers developers to learn, build, and innovate using modern technologies. Through workshops, hackathons, and collaborative projects, it fosters technical growth and a culture of continuous learning.

IEEE CS BRANCH

The IEEE Computer Society (IEEE CS) Student Branch at IIIT Bhopal is a premier technical community that promotes innovation, research, and professional development among students. Affiliated with the IEEE it fosters excellence through technical events, hackathons, and industry engagement.

AXIOS

At Axios, we envision a future where the boundless potential of technology transcends limits and ignites transformative change. We aim to be the driving force behind a community of innovators, united in pursuit of groundbreaking discoveries and excellence.

ECELL

The Entrepreneurship Cell (E-Cell) of IIIT Bhopal serves as the hub for innovation, leadership, and entrepreneurial excellence within the institute. Dedicated to cultivating a startup-driven ecosystem

AARZOO

Everyone works on coding, but pupils' unique abilities encourage them to learn more. As a result, we have a unique society for our cultural activities.

Sports

Inter IIIT Sports Meet

Like many other Inter IIIT events, our students were able to outshine their talents in the Sports field as well. Inter IIIT sports tournaments that were held at IIIT Gwalior (2025) and IIIT Kurnool (2026) proved to be a good platform for IIIT Bhopal students with exceptional performance in Table Tennis and Badminton

Sporlumina

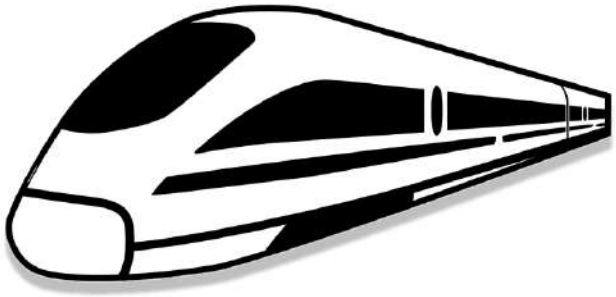

A yearly event held at IIIT Bhopal, Sporlumina is most awaited inter-branch competition in which students actively participate with full vigour and enthusiasm. It includes umpteen sports like Athletics, Kabaddi Badminton, Table Tennis Football, Volleyball, Arm Wrestling, Basketball, Chess, Carrom and Cricket. This annual sports fest witnessed the participation of a multitude of zealous students, thriving sportsmanship. teamwork between teams and a healthy competition besides good wholesome fun. It was also the perfect opportunity for girls to showcase their talent, robustness, strength and stamina and prove that they are no less than anyone, as this event beheld extensive participation by girls.

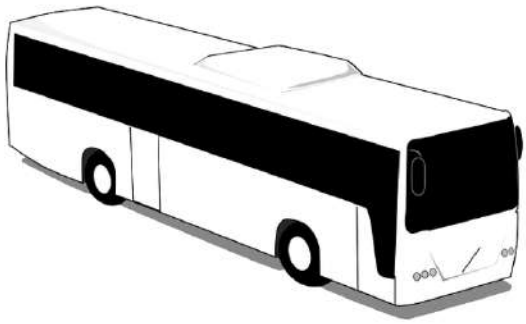

How to Reach us

By train

Bhopal junction is one of the pivotal railway stations of central India located on the Delhi-Chennai main route and serves as a junction for south India as well as the western part of our nation. It links all major cities like Delhi, and Indore via fast running trains like Shatabdi Express and Rajdhani Express ensuring smooth and comfortable travel. It takes less than 20mins to reach IIIT Bhopal from Bhopal junction (7 km) and less than 15mins (5 km) from Habibganj Station.

By road

Bhopal is connected to all key cities by Madhya Pradesh state bus service which provides a healthy and convenient travel experience. Delhi (750 km from the city) and Indore (160 km from the city) are well connected to the city by proficiently maintained bus service. It takes less than 15 mins to reach IIIT Bhopal from ISBT Bhopal (6 kms).

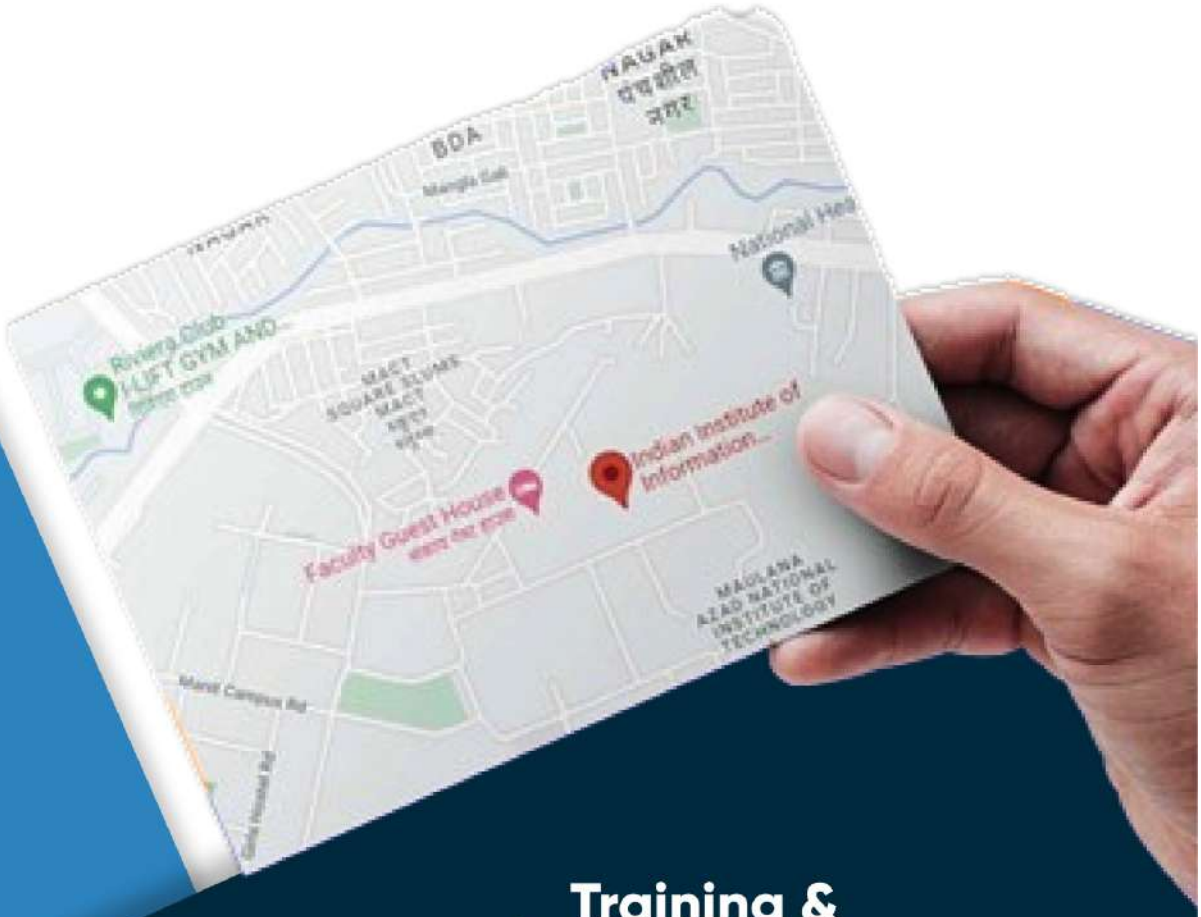

By Flight

Raja Bhoj international airport is one of the prominent airports in India. It connects Bhopal with all major commercial cities like Delhi, Bengaluru, Hyderabad, and Mumbai through non-stop flights. Located at 15 km from IIIT Bhopal it takes less than 30mins to reach the college campus.
